SUMMARY

Computer Science student at BINUS University specializing in Artificial Intelligence, with hands-on experience in frontend development using React.js, JavaScript, and Tailwind CSS. Experienced in building responsive applications and developing machine learning and NLP research projects. Seeking a Software Developer Internship to apply technical and problem-solving skills in real-world software development.

EDUCATION

Binus University — Computer Science, AI Specialization | GPA: 3.48/4.00 | 2024 - Present

SMAKN Anglo Lippo Cikarang — Natural Science | 2021 - 2024

SKILLS

FrontEnd: HTML, CSS, JavaScript, React.js, Tailwind CSS, Three.js, WebGL, GSAP
Programming Languages: Python, PHP, Java, C
Framework & Development Tools: Visual Studio Code, Laravel, Vite, Figma, GitHub, phpMyAdmin
Artificial Intelligence: Machine Learning, Natural Language Processing, Computer Vision
Soft Skills: Problem Solving, Teamwork

PROJECTS

Sinefolis — Cinema UI Web Prototype | HTML, CSS, JavaScript, Figma

- Developed a responsive cinema website prototype using HTML, CSS, and JavaScript, translating Figma designs into interactive movie browsing and booking interfaces.
- Implemented user-friendly navigation and responsive layouts to improve usability and interface consistency for a Human-Computer Interaction project.

Heuristic-Augmented Denoising for Crypto Assets NER | IndoBERTweet, CRF, NLP

- Contributed to an Indonesian cryptocurrency Named Entity Recognition pipeline using IndoBERTweet-CRF, distant supervision, and heuristic denoising to improve training label quality.
- Evaluated model performance against manually annotated data, achieving an 85.41% F1-score on the gold-standard dataset.

Emotion Classification on Indonesian Twitter Text | NLP

- Conducted comparative experiments across 6 machine learning and deep learning models, including SVM, Random Forest, BiLSTM, IndoBERT, and IndoBERTweet.
- Evaluated Indonesian tweet emotion classification using macro F1-score, identifying IndoBERTweet as the best-performing model with a 0.76 macro F1-score.

DevPath — Career Profile Segmentation System | Data Segmentation

- Processed Stack Overflow Developer Survey data using feature engineering and unsupervised machine learning to identify patterns in developers' technical skills.
- Applied UMAP and K-Means clustering to identify 6 developer personas, supporting personalized skill-gap analysis and learning roadmap recommendations.

FootFit — Non-Contact Foot Dimension Measurement | Classical Computer Vision

- Developed a computer vision-based foot measurement prototype using OpenCV and an ID card reference to estimate foot dimensions from images.
- Implemented image processing and measurement logic to classify foot width into 3 categories: narrow, normal, and wide, supporting footwear recommendations.

TixConser App | Java, Java Swing, CSV

- Developed a Java Swing desktop application featuring customer and admin interfaces for concert browsing, seat selection, ticket management, and simulated payments.
- Applied object-oriented programming principles and CSV-based data persistence to manage ticket information and support application functionality.

CERTIFICATIONS

Microsoft Elevate AI Training - Azure AI Fundamentals (AI-900T00-A), 15 hours of learning.
